

2025: A bouquet full of events for NSV – with FLOWER SHOWER as its first release in full bloom

Just in time for this year's Toy Fair in Nuremberg, Nürnberger-Spielkarten-Verlag (NSV) is ready to unveil its latest release. The dice game **FLOWER SHOWER (original title – VOLLE KANNE)** by Sven Kübler invites players to water garden beds filled with different plants as efficiently as possible. Your hands become watering cans, and the dice represent the water you'll distribute. The straightforward gameplay fits perfectly into NSV's lineup of popular roll-and-write games. **VOLLE KANNE** will be available from February 2025, with even more releases planned this year – more than NSV has launched in recent years.

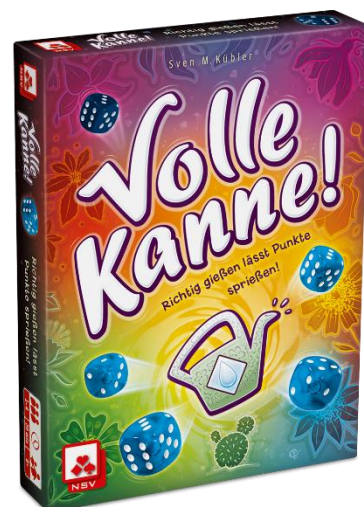

The right dose of water gets you showered with points

In **FLOWER SHOWER**, everyone is involved from the very first moment. Each player starts with their own water die, while an additional die rotates between players so that one person per turn always has two dice to roll. Everyone rolls their dice at the same time and records their results on their individual garden/score sheet. When all fields are filled, the final score is calculated.

The key to scoring lies in the specific needs of the plants. Most flowers require an exact amount of water, which you'll try to match with your dice rolls. Success earns you positive points. Completing all tasks within a garden section unlocks a bonus effect that you can use later in the game for the dice. Then there are plants like clovers, which can't get enough water – here, high numbers are the goal.

On the other hand, cacti prefer it dry, and any extra water will cost you points. With two different gardens to choose from, the game remains fresh and varied.

FLOWER SHOWER is designed for 1-4 players aged 8 and up, with a playtime of about 20 minutes. The German edition will be available from February 2025, both in specialty stores and NSV's online shop. The MSRP is 12€. Instructions in other languages will, as usual, be available on the NSV website.

Nuremberg Toy Fair only the starting signal

The presentation of **FLOWER SHOWER** at the Nuremberg Toy Fair is just the beginning of an exciting, very playful year. In 2025, NSV plans to release more new titles than it has in years. In the first half of the year, a new edition of Moritz Dressler's cooperative word-guessing game **SPUKSTABEN** will hit the shelves. With new gameplay elements, it will offer even more variety for both beginners and experienced players. For the always very busy fall season, two additional new releases are already planned, created by authors who are well-known from the nomination and recommendation lists for *Spiel des Jahres* and *Kennerpiel des Jahres*.

On top of all that, NSV will celebrate two anniversaries. Both **THE GAME** by *Qwixx* creator Steffen Benndorf and **QWINTO** by the duo Uwe Rapp and Bernhard Lach turn 10 years old this year. A special event campaign is planned for late summer to mark the occasion.
